We couldn't wait for you to try our complete classroom kit. So we put part of it on the back of this poster.

For $19.95 you get the software that goes with it.

This poster is just one sample from a complete classroom kit. You get one every time you purchase one of the 20 programs from the Learning Technologies library.

In each kit you'll find (1) one full color poster (as colorful as this one) to display in your class; (2) a custom lesson plan that outlines the best way for your students to interact with the software; (3) three reproducible worksheets featuring activities that extend the skill areas of the software; (4) a reproducible student management chart to record individual progress and (5) a reproducible reward certificate for students who complete the activities.

Each software progam is much more than drill and practice. It's an exercise in a specific learning skill using a creative problem solving process. And we believe so strongly in the quality, we offer an unconditional money-back guarantee: try our software and if you're not completely satisfied, return it for a full credit or refund – no questions asked.

We offer this guarantee because we don't think you'll return it. We think you'll love it. And we think you'll agree your students have a lot to learn from it.
